PRESS RELEASE

For Immediate Release 8 September 2011

ABN AMRO/VM Group: *World Agronomy*

Building grain reserves – storing or hoarding

As unpredictable weather impacts on virtually every crop, we look at the role storage will play in smoothing out disruptions to supply and demand for food.

Elsewhere in *World Agronomy*, we look at

- Japan sticks to carbon targets
- Australia and EU discuss linking their carbon trading platforms
- South Africa sketches out shape of new land regulations
- New Zealand farmland prices continue to free-fall
- Fresh round of investment in Brazilian biofuels
- UK farm input costs rise 13%
- Mexican food prices drop
- First boardroom casualty at Sino-Forest
- Guinea-Bissau looks for record cashew nut exports
- Poles taunt GM sector with idea of EU ban

The September 2011 issue of *World Agronomy*, published today, also carries news on currencies and finance, specialty crop markets, input costs, policy and biofuels. The publication is open-access, free, and available directly from the VM Group at: www.virtualmetals.co.uk

If you want a copy of this report sent to you every month, or should you require further details or commentary, contact: Clare Hayter, VM Group, +44 20 7569 5930 or info@virtualmetals.co.uk
